

## Boston SIMPLUS® Multi-Action Solution

#1 **The #1 Doctor-Recommended 1-Bottle** Gas Permeable (GP) System<sup>1</sup>

Boston SIMPLUS Multi-Action solution is the first and only one-bottle lens care system that not only cleans, disinfects and conditions gas permeable contact lenses, but also removes protein daily, with cleaning comparable to the leading two-bottle GP lens care system.

- The **only** 1-bottle lens care system with cleaning comparable to the leading 1- or 2-bottle gas permeable (GP) lens care system<sup>2</sup>
- The **only** solution with built-in protein removal (superior to the leading 1- or 2-bottle lens care system)<sup>2</sup>
- The **only** no-evening-rub-regimen lens care solution available
- Lubricating/wetting agent retains moisture for optimal lens wearing comfort

## Boston ADVANCE® System

### Boston ADVANCE® Cleaner

Boston ADVANCE Cleaner removes dirt and debris from gas permeable #1 lenses leaving the lenses clean, clear, and ready to be disinfected. Boston ADVANCE Cleaner is visibly tinted and formulated for improved rinsing.

#1 **The #1 Doctor-Recommended 2-Bottle** Gas Permeable (GP) System<sup>1</sup>

### Boston ADVANCE® Comfort Formula Conditioning Solution

Boston ADVANCE Comfort Formula Conditioning Solution provides exceptional lens wearing comfort by coating and cushioning the lenses. Its patented dual preservative system provides excellent disinfection to destroy harmful microorganisms on lenses.

  - 1 FL. OZ. Boston SIMPLUS Multi-Action Solution
  - Gas Permeable contact lens case

# Leading the Way in GP Technology

## Boston® Original Formula System

### Original Formula Boston® Cleaner

Original Formula Boston Cleaner effectively removes debris and deposits from lenses.

### Original Formula Boston® Conditioning Solution

Original Formula Boston Conditioning Solution has a patented wetting agent that coats the surface of lenses to make them smooth, wet, and comfortable. Its single preservative system destroys microorganisms on lenses.

### Boston® One Step Liquid Enzymatic Cleaner for weekly protein removal *The Easiest Way to Remove Protein Deposits from GP Lenses*

Boston One Step Liquid Enzymatic Cleaner works in the lens case while it is disinfecting, so there is no separate step. No tablet or vial needed.

### Boston® Rewetting Drops *Enjoy Longer, More Comfortable Lens Wear*

Unlike traditional lens lubricants, Boston Rewetting Drops recondition or coat the lens surface with a patented polymer.

This protects the lens and helps provide longer, more comfortable lens wear.

### Boston® Lens Case *Specially Designed for GP Lenses*

The Boston Lens Case has ridges specially designed for GP lenses. For proper lens care and storage, replace lens case every three months for safe and healthy lens wear.

*Should your customers have questions or concerns regarding their contact lenses or lens care regimen, encourage them to consult their eye care professional.*
