

Bausch & Lomb replaced
Boston® Conditioning Solution–Original
with Boston® Conditioning Solution–Improved Formula

Bausch & Lomb
Boston®

Why?

The formula change was made as part of a strategic decision to streamline the number of available products, and was accelerated as part of the Bausch & Lomb commitment to providing the best products to our consumers as quickly as possible.

What's the difference between formulas?

Boston® Conditioning Solution - Improved Formula has excellent wettability, improved disinfection efficacy, and same single-preservative system as Boston® Conditioning Solution - Original

When will starter kits be available?

Bausch & Lomb is currently conducting standard stability testing in order to supply a smaller sample size (starter kit). Testing is scheduled to be completed by late 2010. Starter kits for Boston ADVANCE® and Boston SIMPLUS® continue to be available. Additionally, you may purchase full-size care systems for Boston, Boston ADVANCE, and Boston SIMPLUS from your Authorized Boston Manufacturer.
