SGPI II	The LifeStyle Company	43.5	1.07	Blue, Green, Gray, Brown, Clear

Table 2 High Dk Silicon/Acrylate Materials

A wide range of patients can be fit with these types of lenses. They are excellent for hyperopes, special lens designs such as back torics, bi-torics, and especially front torics when prism is necessary, and to help increase wearing time for patients requiring greater oxygen transmission.

*Quoted Dk values are measured using Gas to Gas method unless *, which indicates ISO/Fatt method. [†]FDA approved for extended wear. Many materials are available with or without UV - ask a customer service representative for UV information on your material of choice.*
