EYECARE PRACTITIONERS SHOULD CAREFULLY INSTRUCT PATIENTS ABOUT THE FOLLOWING CARE REGIMEN AND SAFETY PRECAUTIONS:

- When selecting an appropriate lens design and parameters, the eyecare practitioner should consider all characteristics of the lens that can affect lens performance and ocular health, including oxygen permeability, wettability, and center and peripheral thickness, and optic zone diameter.

- The potential impact of these factors on the patient’s ocular health must be carefully weighed against the patient’s need for refractive correction, therefore ensuring the continuing ocular health of the patient and lens performance on the patient should be carefully monitored by the prescribing eyecare practitioner.

- DO NOT USE the lens if:
  - It is contaminated.
  - It has a spherical back surface. The hydrophilic properties of the lens require that it be maintained in a fully hydrated state in a solution compatible with the eye. If the lens dries out, it will become hard and appear somewhat warped however, it will retain its proper configuration when completely rehydrated in the proper storage solution.

- The patient should be instructed not to wear the lens while sleeping. Clinical studies have shown that the risk of serious reaction adverse reactions is increased when lenses are worn overnight.

- Study shows have found that contact lens wearers who smoke have a higher incidence of adverse reactions than non-smokers.

PRECAUTIONS

- DO NOT USE the lens if:
  - It is contaminated.
  - It has a spherical back surface. The hydrophilic properties of the lens require that it be maintained in a fully hydrated state in a solution compatible with the eye. If the lens dries out, it will become hard and appear somewhat warped however, it will retain its proper configuration when completely rehydrated in the proper storage solution.

- The patient should be instructed not to wear the lens while sleeping. Clinical studies have shown that the risk of serious reaction adverse reactions is increased when lenses are worn overnight.

PRECAUTIONS

- DO NOT USE the lens if:
  - It is contaminated.
  - It has a spherical back surface. The hydrophilic properties of the lens require that it be maintained in a fully hydrated state in a solution compatible with the eye. If the lens dries out, it will become hard and appear somewhat warped however, it will retain its proper configuration when completely rehydrated in the proper storage solution.

- The patient should be instructed not to wear the lens while sleeping. Clinical studies have shown that the risk of serious reaction adverse reactions is increased when lenses are worn overnight.

- Study shows have found that contact lens wearers who smoke have a higher incidence of adverse reactions than non-smokers.
Always contact the eyecare practitioner before using any medicine or medications in the eyes.

Inform the employer of being a contact lens wearer. Some jobs may require use of eye protection equipment or may require that the wearer not contact wear lenses.

**ADVERSE REACTIONS**

The patient should be informed that the following problems may occur:

- Eyes stinging, burning, itching (irritation), or other eye pain
- Comfort is less than when lenses were first placed on eye
- Failing that something is in the eye such as a foreign body or scratch area
- Excessive watering (tearing) of the eye
- Unusual eye secretions
- Redness of the eye
- Reduced sharpness of vision (poor visual acuity)
- Blurred vision, rainbows, or halos around objects
- Sensitivity to light (photophobia)
- Dry eyes

**Fitting**

Conventional methods of fitting contact lens do not apply to the IntelliWave®/IntelliWave®/ProKeraSoft IC/ Kerassoft Thin Silicone Hydrogel Daily Wear Soft Contact Lens. For a detailed description of the fitting techniques, refer to the Eyecare Practitioner Professional Fitting and Information Guide, copies of which are available from:

Art Optical Contact Lens, Inc., 3175 3 Mile Road NW, Walker, Michigan 49534

Toll Free Number: 800-253-9364

Online: www.artoptical.com

**WEARING**

**WEARING SCHEDULES SHOULD BE DETERMINED BY THE EYECARE PRACTITIONER.**

FREQUENT-PLANNED REPLACEMENT

It is recommended that the IntelliWave®/IntelliWave®/ProKeraSoft IC/ Kerassoft Thin Silicone Hydrogel Daily Wear Soft Contact Lens be discarded and replaced with a new lens every three (3) months. However, the Eyecare practitioner, you or the patient, may determine an appropriate lens replacement schedule based upon the response of the patient.

LENS CARE DIRECTIONS

Every patient should review with the patient lens care directions, including both basic lens care information and specific instructions on the lens care regimen recommended for the patient.

Basic Instructions:

- Care of contact lenses takes very little time and involves THREE essential steps: CLEANING, RINSING and DISINFECTING. Each step is itself important, and one step is not to be replaced by the other. Always wash, rinse and dry dry hands before handling contact lenses. Always use FRESH, STERILE, UNEXPIRED lens care solutions. Use the recommended chemical (not heat) lens care system. Different solutions cannot always be used together, and not all solutions are safe for use with all lenses. DO NOT ALTERATE OR MIX LENS CARE SYSTEMS UNLESS INDICATED ON SOLUTION LABELING. Do not use saliva or any other fluid to clean, rewet, or disinfect your lenses. Do not put lens in the mouth. Lenses should be cleaned, rinsed, and disinfected each time they are removed. Cleaning and disinfecting are necessary to remove debris and film from the lens surface. Disinfecting is necessary to destroy harmful germs.

Lens cleaning, disinfecting, and storage:

- Clean one lens first (always the same lens first to avoid mix-up), rinse the lens thoroughly with recommended rinsing or disinfecting solution to remove the cleaning solution, moisture, and film from the lens surface, and put lenses into contact chamber of the lens storage case. Then repeat the procedure for the second lens. After cleaning, disinfecting and rinsing the system recommended by the manufacturer and or the eyecare practitioner. To store lenses, disinfect and keep them in the closed/unopened case until ready to wear. If lenses is not to be used immediately following disinfection, the patient should be instructed to place the package intact or the eyecare practitioner for information on storage of lens.

Lenses prescribed for frequent replacement is recommended that the IntelliWave®/IntelliWave®/ProKeraSoft IC/ Kerassoft Thin Silicone Hydrogel Daily Wear Soft Contact Lens be discarded and replaced with a new lens every three (3) months. However, as the Eyecare practitioner, you are encouraged to determine an appropriate lens replacement schedule based upon the response of the patient.

Chemical (NOT HEAT) Lens Disinfection:

- Wash and rinse your hands thoroughly BEFORE HANDLING LENS.
  1. Place lens in the palm of your hand.
  2. Apply 1 or 2 drops of cleanser to each lens surface and gently rub with the forearm of the opposite hand.
  4. Rinse the lens thoroughly with sterile saline solution. DO NOT use water to rinse your lenses.
  5. After rinsing, place the lens in a storage case.
  6. Repeat the process with the other lens.

Cautions:

- Do NOT HEAT THE DISINFECTION SOLUTION AND LENS.

- Lenses prescribed for frequent replacement:

It is recommended that the IntelliWave®/IntelliWave®/ProKeraSoft IC/ Kerassoft Thin Silicone Hydrogel Daily Wear Soft Contact Lens be discarded and replaced with a new lens every three (3) months. However, as the Eyecare practitioner, you are encouraged to determine an appropriate lens replacement schedule based upon the response of the patient.
EMERGENCIES

The patient should be informed that if chemicals of any kind (household products, gardening solutions, laboratory chemicals, etc.) are splashed into the eyes, the patient should:

FLUSH EYES IMMEDIATELY WITH TAP WATER AND IMMEDIATELY CONTACT THE EYECARE PRACTITIONER OR VISIT A HOSPITAL EMERGENCY ROOM WITHOUT DELAY.

HOW SUPPLIED:

Each lens is supplied sterile in a sealed glass vial containing buffered normal saline solution. The glass vial is marked with the base curve, diameter, dioptic power, manufacturing lot number, and expiration date of the lens.

REPORTING OF ADVERSE REACTIONS:

All serious adverse experiences and adverse reactions observed in patients wearing the IntelliWave®/IntelliWave® Pro/KeraSoft IC/ Kerasoft Thin Silicone Hydrogel Daily Wear Soft Contact Lens or experienced with the lens should be reported to:

Art Optical Contact Lens, Inc., 3175 3 Mile Road NW, Walker, Michigan 49534  Toll Free Number: 800-253-9364

CAUTION:  FEDERAL (USA) LAW RESTRICTS THIS DEVICE TO SALE BY OR ON THE ORDER OF A LICENSED PRACTITIONER.
